

Grupo de Investigación SINGACOM
Universidad de Valladolid

Seminario de Matemática Discreta (MD)

Conferencia para el Jueves 10 de septiembre de 2009 a las 11:30h.

**Charles R. Johnson. College of William and Mary, Williamsburg, Va
USA.**

**Some of the Things that I Have Learned from Undergraduate
Students.**

Resumen:

For the past 20+ years, we have held a "Research Experiences for Undergraduates" program at William and Mary, funded by the National Science Foundation. This has attracted top quality students from a rich applicant pool around the US (and occasional foreign students). The goal is that understand and do serious research. After a brief description of the program, a survey of some representative results from the program will be given. These involve matrices, but often in conjunction with other areas.

Lugar: Aula Alan Turing.
Edificio de Tecnologías de la Información y las Telecomunicaciones (ETIT).
